

[Clean Water – 3.575 million people die each year from water-related disease.](#)

The Akran Foundation has sought to help poor and disadvantaged people by improving their quality of life in communities, enabling them to become more self-reliant and independent. We endeavour to do this in the most efficient and effective ways possible by distributing funds and resources directly to charities on the ground and to recipients. We stand by our ethical commitment every day by partnering with organizations around the globe to support initiatives and programs that respond in a meaningful way.
